

## How to Make Fleece Pull-Toys

- ❖ Start with three strips of the pre-cut fleece, making sure they are approximately the same length.
- ❖ Knot the pieces together at one end.
- ❖ Braid the pieces all the way down leaving about six inches unbraided at the end.
- ❖ Knot the end, as you did in the beginning.
- ❖ Tie a loose knot in the middle (see picture).

*These pull-toys are especially nice to send to shelters which house dogs, but can't use our blankets due to chewing, or other, problems. They can be given to the dogs and puppies, and just like the blankets they will incorporate the shelter's scent. Once the dog is adopted, they can take their new toy home with them to provide comfort as they adjust to their new family.*
